

MSHA Compliance Training 2021 Schedule

Space is Limited. Register Early!

View the class schedule and register online at www.nscnne.org

The National Safety Council of Northern New England (NCNNE) will again be offering the Annual Part 46 MSHA Refresher Training and MSHA New Miner Training funded in part through support from grant number MS-03301-19-55-33 from the Mine Safety and Health Administration, U.S. Department of Labor.

Due to the continued concerns with COVID-19, the National Safety Council of Northern New England will be offering the MSHA Pt. 46 Refresher and New Miner trainings via a VIRTUAL CLASSROOM experience (online, interactive training with an instructor). You may have your miners participate in the training as a socially-distanced group or log on from individual computers.

PLEASE NOTE: *If you do not have the available space or computer equipment to participate in the virtual training from your location, please contact our office and we will be happy to assist with special arrangements for your group to participate in the virtual training session from our Concord, NH training facility. The instructor(s) will be live-streamed into the training room and safety protocols including reduced group sizes, social distancing and mask usage will be required.*

If you have any questions, please contact our office:
(603) 228-1401 or (800) 834-6472 info@nscnne.org

MSHA Part 46 Annual Refresher Training 2021 Virtual Classroom

Register online at www.nscnne.org

Class Fee: \$50.00 per person

Class time 7:30 am - 3:30 pm

In accordance with MSHA (Mine Safety & Health Administration) regulations, this one-day program covers 7 hours of training for the annual training requirements for owners and operators under 30 CFR Part 46. Upon completion, students will receive an annual refresher training record for 7 hours of training. (Students will still need to complete a minimum of one hour of site-specific training at each of their worksites in order to meet the 8 hour MSHA annual training requirement.) This certification will expire one year after completion. Your annual MSHA Part 46 Refresher Training will not be complete until you conduct and document the mandatory site-specific training. MSHA Inspectors will issue citations for incomplete 8 hour annual safety training.

SITE-SPECIFIC TRAINING: The employer is required to provide at least 1 hour of site-specific training to their miners annually. As outlined in your MSHA approved Training Plan, your training must address transportation and communication controls as well as changes in the mine environment, etc. Site-specific training is required to fulfill the Annual Refresher Training requirements.

MULTIPLE LOCATIONS: Those miners who work at multiple locations must have site-specific training **FOR EACH LOCATION**, and this must be documented on the training certificate.

*Cities and towns should refer to the Mine Act to determine if their sand & gravel operations would be subject to the 1977 Miners Act, and would therefore be expected to meet annual MSHA refresher training for their miners. Cities and towns that operate screeners and/or crushers to process material, and then take that material off-site to apply to public roads or other worksites **DO** fall under MSHA jurisdiction. Towns and cities that **purchase** sand and gravel for their roadways and other projects (instead of producing it themselves) **DO NOT** fall under MSHA jurisdiction.

NEW! MSHA Refresher - HEAVY EQUIPMENT OPERATOR EMPHASIS for Metal/Non-Metal Surface Miners

To specifically address the safety hazards associated with surface mines and haulage, NSCNNE is offering an MSHA annual Refresher program tailored for heavy equipment operators and truck drivers. Topics will include site and operational risk assessment, the dangers of distracted driving or operation, pedestrian safety, etc.

Contact NSCNNE at 1-800-834-6472 or info@nscnne.org

MSHA 2021 NEW MINER Training Schedule

All **NEW MINERS** are required by MSHA to **complete 24 hours of training in their first 90 days** of employment. MSHA requires at least 4 hours of training (including the "Rules to Live By" segment) be conducted **BEFORE** a new employee can enter a mine site. NSCNNE offers an 8 hour New Miner program that includes the "The Rules to Live By" training and can assist mines in delivering a portion of the 24 hour New Miner training required by MSHA.

All 2021 MSHA NEW MINER Sessions run from **7:30 am to 4:30 pm**

NEW MINER	April 14, 2021 (Wed)	MSHA– New Miner
	May 3, 2021 (Mon)	MSHA– New Miner
	June 7, 2021 (Mon)	MSHA– New Miner
	July 12, 2021 (Mon)	MSHA– New Miner

Get the Training Your Need!

The National Safety Council of NNE offers other workplace safety trainings that may be used towards meeting a new miner's training requirements including First Aid certification, OSHA 10 Hour classes, etc.

For scheduling, registration or room usage questions please contact NSCNNE at 1-800-834-6472 or info@nscnne.org

To view all of our upcoming classes, visit our website www.nscnne.org

REGISTRATION AND CANCELLATION POLICY: Advance registration for MSHA classes is required. There will be no refunds for participant cancellations and no-shows, however, other participants can be substituted or dates changed given at least 24 hours notice. NSCNNE reserves the right to cancel any class for reasons of inclement weather or class sizes of less than 10, in which case a full refund will be given or credit for a future class if preferred.

Even though the 2021 MSHA classes will be held virtually, our office recognizes the important role that many of you have in keeping our winter roads plowed and sanded. In the event of predicted inclement weather, an announcement to re-schedule the class will be made by noon the day before the class date. Registrations for the cancelled class will then be transferred to another requested class date.
